

ReSPECT

Recommended Summary Plan for Emergency Care and Treatment

ReSPECT is a process that creates and records personalised recommendations for a person's clinical care at a future time, when they may be unable to make or express choices. It provides health care professionals caring for these people with a summary of recommendations to help them to make immediate decisions about a person's care and treatment.

From 25 September Hampshire Hospitals NHS Foundation Trust and our local delivery system partners will be implementing ReSPECT.

ReSPECT is a plan created through conversations between the person and their clinicians.

ReSPECT Recommended Summary Plan for Emergency Care and Treatment for:

1. Personal details

Full name	Date of birth	Date completed
NHS/CHI/Health and care number	Address	

2. Summary of relevant information for this plan (see also section 6)

Including diagnosis, communication needs (e.g. interpreter, communication aids) and reasons for the preferences and recommendations recorded.

Details of other relevant planning documents and where to find them (e.g. Advance Decision to Refuse Treatment, Advance Care Plan). Also include known wishes about organ donation.

3. Personal preferences to guide this plan (when the person has capacity)

How would you balance the priorities for your care (you may mark along the scale, if you wish):

Prioritise sustaining life, even at the expense of some comfort	Prioritise comfort, even at the expense of sustaining life
---	--

Considering the above priorities, what is most important to you is (optional):

- The plan is recorded in brief on the ReSPECT form and includes their personal priorities for care and agreed clinical recommendations about care and treatment that could help achieve the outcome that they would want, that would not help, or that they would not want.
 - ReSPECT helps reduce unnecessary or unwanted interventions for the person.
 - ReSPECT can be complementary to wider advance care planning and we are working rapidly towards this information being shared electronically within and between organisations.
 - The conversations taking place as part of the ReSPECT process are already happening and currently recorded in many different places - this formalises recording in one place, which is easily identifiable by professionals in an emergency situation.
 - ReSPECT forms replace DNACPR forms.
 - ReSPECT forms are found on wards in the ReSPECT box; put in lilac wallets in the notes to easily identify, in case of emergency.
 - ReSPECT forms go with patients on discharge.
